1. This Office action is in response to the after final amendment filed 5/9/06 and entered and refers to the final rejection mailed 2/10/06.

2. The following is an examiner's statement of reasons for allowance: applicants amendments have overcome the remaining minor formal issues in the present case. As applicants point out, MPEP 804(2) requires that in the instance of an obviousness type double patenting rejection being the sole remaining grounds of rejection, the senior case be allowed and the junior case be rejected for obviousness type double patenting. That is the case between the present application and USSN 10/893754, hence the obviousness type double patenting rejection against the present claims is withdrawn. Although claim 1 recites a catalyst "composition", the other independent claim and many of the dependent claims recite a "system"; while "system" is generally a term of art denoting an apparatus claim, no such further limitation should be read into the claims of the present application which recite "system" instead of "composition"; for purposes of this case the two words are synonymous and refer to a combination of chemical compounds, not an apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Pasterczyk whose telephone number is 571-272-1375. The examiner can normally be reached on M-F from 9 to 5:30.
